

COVID-19 Ag HOME TEST

CE₁₄₃₄

INTENDED USE

Turklab's COVID-19 Ag Home Test is a rapid immunochromatographic assay for the qualitative detection of SARS-CoV-2 nucleocapsid antigen in human nasal swabs for self testing.

- No need for trained professionals or special equipment to perform the test.
- Varified detection of Omicron variant's nucleocapsid antigen.
- Showed no reactivity with other human coronavirus species or other respiratory viruses.
- All the components of the test are included in the kit.

PERFORMANCE EVALUATION

- Sensitivity : 96,58%
- Specificity: 99,47%
